Be ready before you bring your puppy home!

PUPPY FOOD:

“DIAMOND” SMALL BREED PUPPY (BLUE/WHITE BAG)

NUVET PLUS CANINE WAFERS IMMUNE SYSTEM BUILDER VITAMINS:

WWW.NUVET.COM discount code: #21577

½ WAFER UP TO 5 POUNDS

1 WAFER 5 POUNDS/OVER

BOTTLED WATER: We have well water, and the puppies will smell chemicals in city water. We recommend that you use bottled water until they are use to different water.

PUPPY PADS: Your puppy has been puppy pad trained since he/she could get out of bed. Make sure when placing Training Pads in your home that you keep them close by to your puppies view. Given too a large an area to run and play, he/she will become lost to his/her potty spot and likely have an accident. Always make sure the Puppy Training Pad is in his/her sight. I have found more success with Pet All-Star Training Pads XL. You can order them from Amazon or buy them at Walmart.

SMALL PET BED: Purchase a small bed to fit his/her puppy size. If the bed is too large, the puppy will likely go potty in the other side of his/her bed. If you can't find a small enough bed, place a small blanket or towel to fill up the extra space. Puppies will not usually soil their beds and filling up this area will force them out onto the puppy pads. Remember that the first thing a puppy will do when they first wake up is to go potty, so keep the pad close. If you plan to crate your puppy, you will follow the crate training directions in the New Puppy Information Packet. Also, dachshunds love to chew, so check their beds each day for holes and places where the bed stuffing can come out and your puppy/dog can eat it. This can cause an obstruction which will require an expense and serious surgery to save your puppy's/dog's life.

PLAYPEN OR EXERCISE AREA:

We recommend an exercise area to keep your puppy safe at all times. (www.dog.com “exercise pens”)

Also, you may use baby Pack-n-Play Playpens to keep your puppy safe. Most of our puppies are raised in these and will be familiar with them.

SMALL FOOD/WATER BOWL: Metal is preferred, but avoid plastic due to bacteria. I wash and clean their water bowls every day!

TOYS: WATCH TOYS WITH PLASTIC FILLING, EYES, ETC. AVOID TOYS THAT HAVE ANYTHING THAT YOUR PUPPY COULD CHEW OFF AND INGEST. PUPPIES HAVE SHARP TEETH AND CAN CHEW THROUGH MANY THINGS. NYLA BONES AND CHONGS MAKE SAFE TOYS. REMOVE ALL TAGS, RIBBONS, ETC. FROM NEW TOYS BEFORE ALLOWING PLAY TIME. AGAIN, YOU DON'T WANT AN OBSTRUCTION SURGERY TO SAVE YOUR PUPPY/DOG!

GROOMING:

Brush/Comb
Nail Clippers

BASICS:

Body harness (not a collar due to back injuries) for walking
Leash
Training Treats
Waste pick up bags

You are now a member of our Special “Crème of the Crop” Family. You have a lifetime of love and support for your new puppy. We are always available for questions and concerns of any kind. We do not go away after your puppy is in his/her forever home! We do of course enjoy hearing from you and seeing and receiving photos/videos of your precious puppy to share on our Facebook page and website! We may not always know the answer but will do our best to help you find out!

YOU CAN REACH ME AT 979-814-0642 OR EMAIL: leslieurso@yahoo.com

THANK YOU FOR LOVING AND CARING FOR OUR CRÈME OF THE CROP “DREAM CREMES!”
